- Created wireframes, prototypes, and high-fidelity designs using Figma
- Collaborated with developers and stakeholders to ensure design implementation
- Improved user experience by solving real-world usability challenges

Projects

RaanZo App and Web (Mobile app | Website | Case study)

- RaanZo is a mobile and web application designed to connect business owners directly with customers.
- The app allows business owners to create and manage their business profiles to increase visibility and growth
- It supports multiple categories, making it suitable for various types of businesses at any time
- Users can easily search and connect with businesses based on their needs
- The app features a user-friendly UI, ensuring a smooth and easy experience for both customers and business owners

Truck Ledger App (Mobile app | Case study)

- Designed an expense tracking app for lorry drivers and owners
- Enabled users to record trip expenses, income, and balance tracking
- Added features for finding nearby drivers and assigning trips
- Created separate user flows for drivers and owners.
- Improved financial tracking and operational efficiency

Toilet Finder App (Mobile app | Case study)

- The Toilet Finder App helps users easily find nearby toilets.
- It is especially useful for travelers, women, and the general public.
- Users can check toilet locations, details, and images for better understanding.
- The app allows users to add new toilets, making it community-driven.
- The main goal is to provide a safe, convenient, and accessible solution for everyone.

Road Rules App (Mobile app | Case study)

- The Road Rules App helps users learn traffic rules and road safety.
- It explains road signs, signals, and fines in a simple way.
- The app uses quizzes to make learning fun and interactive.
- It is useful for beginners, drivers, and the public.
- The goal is to improve road safety and reduce traffic violations.
